## OVERVIEW

- We have assigned our 'zaA (sf)' and 'zaA-1 (sf)' ratings to the class A notes from Bayport Securitisation (RF) Ltd., a South African ABS transaction, which have been issued in multiple batches.
- The securitized portfolio comprises South African consumer loan receivables originated by Bayport Financial Services 2010 (Pty) Ltd. (Bayport).

SOUTH AFRICA (Standard & Poor's) Sept. 6, 2013--Standard & Poor's Ratings Services today assigned its 'zaA (sf)' and 'zaA-1 (sf)' credit ratings to Bayport Securitisation (RF) Ltd.'s consumer loan-backed class A notes issued from Bayport Financial Services 2010 (Pty) Ltd.'s (Bayport's) existing securitization program (see list). Bayport Securitisation (RF) Ltd. is a South African asset-backed securities transaction.

The ratings reflect our view on the following factors:

- **Economic outlook:** Our base-case default rate assumption for the portfolio reflects our expectation for a moderate growth in economic output and personal income in South Africa. Our baseline economic scenario for South Africa forecasts real GDP growth between 2.7% and 3.8%, real per capita income growth between 2.2% and 3.3% over the next few years, and a continued low consumer price index at around 5.5% (see "Republic of South Africa," published March 27, 2013).
- **Operational risk:** We view the receivables originator and seller, Bayport, to be adequately able to fulfill its obligations as servicer. The

stand-by servicer, MBD Credit Solutions (PTY) Ltd. (MBD), has been in place since inception to replace Bayport if the issuer terminates its role as servicer.

- **Credit risk:** We have analyzed credit risk based on our 2011 principles of credit ratings criteria and our European consumer finance criteria to derive our assumptions on default, recovery and delinquency rates, and portfolio yield (see "Principles Of Credit Ratings," published Feb. 16, 2011, and "European Consumer Finance Criteria," published March 10, 2000). We received more than three years of the underlying portfolio's historical performance records to support our credit assumptions. While our expectations for the South African economy remain modestly positive for the next few years, we have noted a rising trend in nonperforming consumer loans among the market leaders. Nevertheless, we believe that Bayport's portfolio will be more resilient to this trend based upon its conservative stance to affordability measures as part of its credit risk management, its relatively stable performance during the 2009 recession, and the portfolio's large exposure to public sector employment.
- **Cash flow analysis:** Our cash flow model reflects our assessment of the transaction's payment structure and our credit and cash flow assumptions, which we have made based on our 2011 principles of credit ratings criteria and our European consumer finance criteria. Our analysis indicates that the level of credit enhancement available to the rated notes is sufficient to mitigate the credit and cash flow risks at the 'zaA (sf)' rating level.
- **Counterparty risk:** The transaction will be exposed to the credit risk of Standard Bank of South Africa Ltd. (unsolicited ratings 'BBB/Negative/A-2') as the issuer bank account provider. We consider the transaction documents to adequately mitigate this risk at a 'zaA (sf)' rating level in line with our current counterparty criteria (see "Counterparty Risk Framework Methodology And Assumptions", published June 25, 2013). The servicer is an unrated entity. We consider that the risk of loss of cash collections falling into the servicer collection accounts is structurally mitigated according to our 2013 counterparty criteria, as the exposure period is limited to one business day.
- **Legal risk:** We consider the issuer to be a bankruptcy-remote entity in line with our asset isolation and special-purpose entity criteria, and we have received legal comfort that the sale of the assets would survive Bayport's insolvency as the seller (see "Asset Isolation And Special-Purpose Entity Criteria--Structured Finance," published May 7, 2013).
- **Rating stability:** Under our scenario analysis, we ran two stress scenarios and an assessment of the transaction's performance. In our view, the results of our scenario analysis are commensurate with our 2010 credit stability criteria (see "Methodology: Credit Stability Criteria," published May 3, 2010).

Our ratings reflect our assessment of the transaction's main features, as well as an analysis of the transaction's counterparty and operational risks. Our analysis indicates that the credit enhancement available to the rated notes is sufficient to mitigate the credit and cash flow risks to a 'zaA (sf)' rating

level.

The securitized portfolio comprises South African consumer loan receivables originated by Bayport in the ordinary course of its business. The transaction does not have a fixed revolving period; it will revolve until the issuer repays the outstanding debt in full, or, upon an acceleration event.

#### STANDARD & POOR'S 17G-7 DISCLOSURE REPORT

SEC Rule 17g-7 requires an NRSRO, for any report accompanying a credit rating relating to an asset-backed security as defined in the Rule, to include a description of the representations, warranties and enforcement mechanisms available to investors and a description of how they differ from the representations, warranties and enforcement mechanisms in issuances of similar securities.

The Standard & Poor's 17g-7 Disclosure Report included in this credit rating report is available at <http://standardandpoorsdisclosure-17g7.com/1653.pdf>.
